

GIVING YOU GREEN LIGHTS!

Integrated Traffic Solutions, a Traffic Control Corporation company, is your one stop resource to maximize the performance and efficiency of your traffic signal system. We apply value-based expertise and decades of experience to help you get the absolute most out of your traffic signal system.

At ITS, we're breaking the model to provide more Green Lights for your drivers resulting in safer roads, greener impacts and more efficient systems.

Our Services

We are drivers too. We know what great signal systems are capable of, and we know what it looks like when they underperform. We use our experience to find the most efficient way to maximize your existing system. We provide value based advice on how to systematically upgrade your system to leverage existing investments and squeeze every ounce of capacity out of your system.

Traffic isn't static, it is dynamic, and so is our approach. We partner with you to find the improvements that can make the biggest impact on driver experience. With our in-field and traffic engineering expertise combined, we can see and do what others can't. You don't always have to replace when you can improve!

Our expert team of professionals, engineers and technicians, do what others can't. They deliver ongoing optimized travel performance and safety through hands-on, valued based approaches to give you the biggest return on your existing and planned investments.

Leveraging ITS Services will

Reduce Emissions

Reduce Travel Time
Reduce Fuel Consumption

Ease Congestion and reduce stops

Safer Mobility

Improved Quality of Life

Reduce Complaints

Value Based Traffic Engineering

Complaints about traffic? Challenging operations or conditions that need improvement? Our team of experts have decades of experience providing value-based improvements to any traffic condition. Our focus on operations uses your existing infrastructure, when possible, to tackle those challenges and deliver fast and effective improvements to your system. If you struggle with signal progression, special events or just continual complaints, we can make those challenges disappear so you can focus on other tasks. Let our team show you what we have done for others and can do for you.

Maintenance

Trouble getting in the recommended preventative maintenance visits? Not only is this a huge risk management issue, it also reduces the life of your equipment and small problems can become large ones. Our team can tackle that often put-off PM task and at the same time make sure your system is optimized. We document and support everything we do so you can be assured that the intersection equipment is operating at its fullest.

Beyond traditional maintenance, our experts are manufacturer agnostic and can make quick improvements that extend the life of your system. If we see something that needs more addressing, we work with you to correct it on the spot or take your lead on the next best steps.

History

While Integrated Traffic Solutions (ITS) as a name and logo are new, the services and support are things we have been doing for our customers for almost 80 years. As part of Traffic Control Corporation, our team of experts have experience as public employees, industry experts, and network communication professionals. We have been supporting and managing traffic operations through our regionally placed experts for dozens of agencies. We are ready to assist you in getting the most out of your system.

It is no secret that sitting at a red light is so annoying they have even written songs about it. Are your traffic signals running as green as possible? We deliver those green lights so you can be a traffic "rock star". Lowering travel time and stops is proven to reduce emissions, improve safety and increase driver satisfaction. Let us help launch your epic traffic transformation.
